Project:	Sales and Inventory
End Term Specification	
Frontend/UI Malanum, Noel C. Lopez, Rusty C.	Create a homepage with links: Medicines, Sales, and Inventory Create a form to add new medicine (Name, Quantity, Price) Create a form to edit medicine details Create a table to display all medicines in inventory Add a delete button next to each medicine in the inventory table Add a search box to find medicines by name in inventory Add filter options for low-stock or out-of-stock medicines Create a simple sales form to select medicine and quantity Show total price in the sales form Show success/error messages for actions (added, updated, deleted, sold)
Backend/Logic Malasan, Gian L. Gabino, Ezekiel John D.	Connect PHP to the MySQL database Write code to add a new medicine Write code to edit medicine details Write code to delete a medicine Write code to fetch and display all medicines Write code to search medicines by name Write code to process a sale (reduce stock) Validate inputs (no empty fields, numeric quantity/price) Show success/error messages after database actions Insert sample medicines into the database
	Create a database Create a table medicines (id, name, quantity, price)

Database/Storage Malasan, Gian L. Gabino, Ezekiel John D.	Create a table sales (id, medicine_id, quantity, total_price, sale_date) Make id auto-increment in both tables Make name unique in medicines Ensure quantity and price are numbers Reduce medicine quantity after a sale Fetch all medicines for display Insert sample medicines Insert sample sales records
Testing/QA Malanum, Noel C. Lopez, Rusty C.	Test adding a new medicine and check if it appears in the inventory table Test editing medicine details and verify the changes are saved Test deleting a medicine and check it is removed from inventory Test search functionality in inventory by medicine name Test processing a sale and verify the stock is reduced correctly Test total price calculation in the sales form Test input validation by entering empty or invalid values Test low-stock alert for medicines with quantity < 5 Test display of success/error messages after each action Test navigation between homepage, medicines, sales, and inventory pages
